Information about company**

Zabrze, 12-08-2019

DYSTEN is a Polish company that designs, manufactures, delivers and installs equipment for Intelligent Transportation Systems in LED, LCD or TFT technology. Our products can be found in Poland, Germany, Italy, Great Britain, Finland, Norway, Lithuania, Romania and on the Middle East market. Technologies we offer contribute to the development of safe, efficient and environmentally friendly transportation. The operating philosophy of DYSTEN is based on supplying customers with the best available solutions, which results in their conformity to the ISO 9001 standard. This year, DYSTEN was awarded the title of the best European manufacturer of railway ITS display systems by the British magazine International Transport News.

Public transport products:

- Displays for Dynamic Passenger Information Systems
- Passenger information system for railway
- Directional boards for vehicles
- Route visualisation
- Video walls
- Boards and Signs with Variable Message
- Parking displays
